UncoveringHandRadiograph/](http://preview.fluidmedia.com/UncoveringHandRadiograph/)

We have recently released the second edition of 3 Imaging Apps in Rheumatology, the ESIMR series, Essential Imaging In Rheumatology. This is a joint project between rheumatology and radiology to increase awareness and understanding of the indications, assessment and impact of imaging in rheumatological disease.

Available on **iOS and Google play**, can also be accessed via the **Canadian Rheumatology Association** website ('Smartphone Apps' section of the CRA website).

We were fortunate to provide all Apps **free download for a limited period** on both iOS/Android App Store (ESIMR) as well as **free desktop downloads** (Tap on links in Boxes)

John O'Neill

(Associate Professor, Musculoskeletal Imaging, McMaster University/St Josephs Healthcare, Hamilton, Canada)
