

SSR Scholars Award Criteria

The SSR scholars will be selected by a review committee made up of experienced SSR members from across the country who have demonstrated a strong interest in resident and fellow education. Each applicant will be assessed based on their past accomplishments (as stated in their CV), answers to essay questions (which were part of the initial application), and letter of recommendations. The committee will be looking for (1) evidence of a strong interest in MSK radiology as a future subspecialty and (2) candidates who would most benefit from the program.
